Some parts are printed with inks other than vegetable inks.
Company Mission

Quality is our top priority at all times. Our objective is to contribute to the advancement and progress of our culture through a consistent supply, under all circumstances, of high quality products in large volumes to the global market.

Company Mission and Policies

The ROHM Group has communicated the Company Mission to its employees since its establishment in order to become a company that can be trusted and relied upon by society.

Policies to achieve the Company Mission are laid out and serve as guidelines for all business activities. Although the environment surrounding the company has changed with the emergence of an information-based society and increased diversification of values, these policies remain unchanged and serve as the driving force and foundation of all business activities.

BASIC MANAGEMENT POLICY

Secure reasonable profit through a concerted company-wide effort for a comprehensive quality assurance program.

Develop globally leading products by improving upon technologies held by each department for continued advancement of the company.

Maintain healthy and vigorous lifestyles and refine intellect and humanitarianism, hence contributing to society. Search extensively for capable human resources and cultivate them as cornerstones for building long-term prosperity.

BASIC QUALITY ASSURANCE POLICY

1. Promote internal standardization for the whole company and establish structures for QC management by data.

2. Conduct comprehensive and continuous research for the development of new technologies and products.

3. Proactively utilize methods of statistical control for all areas of company activities.

4. Establish quality assurance structures for all manufacturing processes.

5. Exert effort for cost reductions of each product by continual modernization of manufacturing systems.

6. Secure quality assurance programs of raw materials and components with our suppliers through contracts.

BASIC GOALS FOR EDUCATION AND TRAINING

1. Develop personnel at all levels to constantly strive to obtain new knowledge and to acquire empirical reasoning ability from a broad perspective.

2. Train staff to be dedicated as leaders in their field by utilizing their knowledge and experience.

3. Develop personnel who can overcome any adversity and strive towards achieving targets.

4. Train staff to place the highest value on teamwork, resulting from the combined efforts of all individuals.

BASIC POLICY FOR EDUCATION AND TRAINING

1. All employees will use every available opportunity to enhance self-development.

2. Those in leadership positions will exemplify model behavior at all times.

3. The emphasis of education is on the job training led by the supervisors through daily operations. Supplementary training off the job is also provided.

4. Each head of all management levels will appraise staff fairly and conduct effective training programs periodically and consistently.

5. Appraisals for each head of all management levels is based, as a general rule, on the success of staff education and training.

Message from The President

Achieving Sustainability

This year marks the 60th anniversary of ROHM, which was founded in 1958 as a resistor manufacturer. On behalf of everyone at ROHM I would like to give thanks and express how grateful we are to all of our stakeholders. For 60 years, in the midst of a business environment that has undergone significant changes and endured numerous difficulties, we remain steadfast in our resolve to contribute to the advancement of culture and society by providing innovative, high-quality products based on our Company Mission established since ROHM was founded. At the same time, we will continue to promote CSV (Creating Shared Value) activities and work to resolve social issues (SDGs - Sustainable Development Goals).

Under our new organization, each employee will carry out our Company Mission and Basic Management Policy to achieve further growth while continuing to pursue new methods to improve quality.

‘Quality First’ - Unwavering since our founding
ROHM offers a number of products that have become key devices in a wide range of fields, particularly in the industrial equipment market where energy conservation and IoT conversion are required, as well as in the automobile industry which is experiencing increased innovation.

Supporting our product development is a vertically integrated production system in which all steps, from development to production, are implemented within the Group. "Quality is our top priority at all times" has become our mindset from the very beginning and one which we continue to maintain and protect. Infusing a high level of quality into every process ensures reliable traceability and an optimized supply chain, allowing us to contribute not only through our products but an in-house manufacturing system as well that guarantees stable delivery.

Solutions for solving social issues
We are committed to proposing solutions that leverage our considerable lineup, ranging from resistors and discretes to ICs, modules, and more. Analog power solutions are at the core of what we offer.

Our industry-leading analog ICs, which include motor drivers and PMICs, are developed utilizing 3 core technologies covering circuit design, layout, and processes. And by taking advantage of power device technology centered on cutting-edge SiC along with power solutions combining control IC and module technologies that maximize the performance of these devices, ROHM contributes to increased energy conservation and miniaturization in the automotive and industrial equipment fields.

Maintain healthy and vigorous lifestyles and refine intellect and humanitarianism, hence contributing to society
More than anything, it is the ‘people’ that make the greatest contribution in all corporate activities, and in fact this word can be found in our Basic Management Policy.

In an increasingly diversified society, we carry out workplace reforms and accelerate corporate activities by creating a thriving environment that allows every ROHM Group employee to express their individuality and abilities to the fullest, with the goal of meeting the expectations of our stakeholders.

June 2018

June 2018

Tadanobu Fujiwara, President
Vertically Integrated Production System

ROHM strives for “Quality First” as our Company Mission. Quality is incorporated into every process of our vertically integrated production system, from ingot pulling to finished products, embodying our quality-first pursuit. We are further strengthening our activities to achieve the best production facilities in the world, for example through our proprietary ROHM Production System (RPS) that provides unparalleled quality by thoroughly removing all waste generated during operation, transportation, and delays.

**High Quality**

In pursuit of “Quality First,” we are engaged in activities to enhance quality in all processes, from development and production to marketing and sales, throughout the entire Group.

**Stable Supply**

We deliver long-term, stable supply to ensure worry-free use of our products utilizing an integrated production system that is less susceptible to external factors.

**Quality Initiatives**

Wafer production from silicon ingot pulling

Raw Materials

- Water production from silicon ingot pulling

Production Site: ROHM Apollo Co., Ltd. (Japan)

**In-House Photo Mask**

Pursuing high quality through integrated quality control, from IC chip design layout to photo mask production.

**Wafer Process**

Developing innovative devices from the wafer process, centered on our production facilities in Japan.

Production Sites:
- (Japan) ROHM Co., Ltd.
- ROHM Hamamatsu Co., Ltd.
- ROHM Wako Co., Ltd.
- ROHM Apollo Co., Ltd.
- LAPIS Semiconductor Miyagi Co., Ltd.
- LAPIS Semiconductor Miyazaki Co., Ltd.
- ROHM Shiga Co., Ltd.

**In-House Production System**

We developed our own production system to precisely meet the needs of our customers.

- All production equipment developed in-house

**In-House Dies and Lead Frames**

To ensure the highest levels of quality, all dies for lead frames, lead frame punching, and molding are developed and produced in-house.

**State-of-the-Art Packages**

Our overseas production facilities leverage the latest assembly technologies, including SLP, CSP, QFN, and BGA.

Production Sites:
- (Korea) ROHM Korea Corporation (Philippines)
- ROHM Electronics Philippines, Inc.
- ROHM Electronics Dalian Co., Ltd.
- ROHM-Wako Electronics (Malaysia) Sdn. Bhd.

**Silicon Ingot**

**Silicon Carbide**

**SiCrystal**

**SiC Single-Crystal Wafer Manufacturer**

SiCrystal, a German SiC single-crystal wafer manufacturer, became a member of the ROHM Group in 2009.

Production Site: SiCrystal GmbH (Germany)

**Wafer Process**

- CAD
- Photo Mask

**In-House Photo Mask**

- Pursuing high quality through integrated quality control, from IC chip design layout to photo mask production.

**Production Site:** ROHM Apollo Co., Ltd. (Japan)

Transistors

We are moving forward with expanding and enhancing our portfolio of high-power devices based on our industry-leading SiC MOSFETs while pursuing technologies in the compact, low-power sector. This will allow us to contribute to greater power savings and miniaturization in industries ranging from automotive and industrial equipment to smartphones.

Diodes

ROHM offers a wide lineup that provides low loss and high reliability in a variety of applications, including Schottky barrier diodes for rectifying the secondary side of power supply circuits, TVS (Transient Voltage Suppression) diodes widely used for circuit protection, and Zener diodes.

LEDs/Laser Diodes

We make compact, high-power devices a reality by combining proprietary device and precision processing technologies. Recently, we have expanded our development into new fields such as motion and position sensors.

Resistors

As a resistor pioneer, ROHM developed the world’s first rectangular chip resistors in 1976 and continues to lead the industry. We have further strengthened our product lineup with high reliability, high-power products that support the automotive and industrial equipment fields.

Thermal Printheads

Our thermal printheads command the top share in markets such as receipt and logistics barcode printers through the utilization of high-reliability thin-film and deposition technologies.

Sensing Devices

ROHM creates a wide range of sensing devices by combining a variety of sensor elements that leverage MEMS (Micro-Electro Mechanical System) and photonics technologies with ASICs (Application-Specific Integrated Circuits) optimized for using these elements.

Power Management/Power Supply ICs

ROHM contributes to the evolution of battery life and equipment systems by efficiently providing optimized power to the MCU and CPU, which serve as the brains of the device. We provide solutions that combine both power supply ICs and control ICs customized to each application to ensure greater reliability and efficiency.

Motor Driver ICs (Motor Controllers ICs)

Nearly half of the electric power consumed worldwide is said to be due to motors, and this power demand is only expected to rise as the number of motor-equipped products such as air conditioners and robots continues to increase. ROHM develops high-precision motor driver ICs that ensure efficient motor drive, contributing to reduced power consumption worldwide.

General-Purpose ICs

ROHM’s broad lineup includes memory, op-amps/comparators, reset ICs, power supply ICs, data converters, and other products featuring systemized characteristics and packages that contribute to improved functionality in a range of devices.

Microcontrollers (Low-Power MCUs)

Our microcontrollers utilize proprietary low-power technology to deliver class-leading low energy consumption. We offer a lineup of microcontrollers that stand up to harsh noise and high temperature environments, resulting in improved reliability and energy savings in home electronic appliances and industrial equipment.

Wireless Communication Devices

We respond to the expanding needs of the IoT market with wireless communication devices that support a range of protocols, including Wi-SUN and Sigfox® that enable communication over long distances with minimal energy, as well as EnOcean®’s battery-free standard.

Superior Technologies

The ROHM Group offers a broad variety of products that contribute to solving social issues related to energy conservation, safety, and security, ranging from passive and discrete devices to ICs and modules.

Products and Technologies

Resistors

As a resistor pioneer, ROHM developed the world’s first rectangular chip resistors in 1976 and continues to lead the industry.

We have further strengthened our product lineup with high reliability, high-power products that support the automotive and industrial equipment fields.

Thermal Printheads

Our thermal printheads command the top share in markets such as receipt and logistics barcode printers through the utilization of high-reliability thin-film and deposition technologies.

Sensing Devices

ROHM creates a wide range of sensing devices by combining a variety of sensor elements that leverage MEMS (Micro-Electro Mechanical System) and photonics technologies with ASICs (Application-Specific Integrated Circuits) optimized for using these elements.

**Analog Solutions**

ROHM contributes to the enhancement of systems by leveraging unmatched analog technologies made possible through our vertically integrated production system.

Power supply solutions for high-performance processors

ROHM continues to collaborate with top processor manufacturers to develop power management ICs that maximize processor performance in a wide range of fields including IT devices, automobiles, and industrial equipment. We utilize processor power supply technologies cultivated over many years to provide the multiple power supplies and protection functions necessary for operation in an integrated package, contributing to system optimization and shorter development times.

Power supply solutions for 48V systems

Our Nano Pulse Control technology for ultra-high-speed pulse control was created through the fusion of analog technologies covering circuit design, layout and processes. We minimized the control pulse width of our power supply ICs down to the nanosecond to realize a breakthrough step-down ratio. This technology will allow us to make significant contributions towards smaller, simpler 48V systems, such as those used in mild hybrid vehicles and industrial robots.

**Power Solutions**

Offering solutions for high-power applications with our industry-leading SiC devices at the core.

Inverters for Formula E

As a stage for showcasing electric vehicle innovation, Formula E continues to attract motorsports fans around the world. And as an official technology partner of Formula E team Venturi, ROHM contributes to the evolution of power electronics systems used in the premier racing class for electric vehicles through the supply of high-performance SiC devices.

SiC power solutions for onboard vehicle chargers

Electric vehicles require high-performance charging applications that can handle large amounts of power. ROHM offers power devices with superior characteristics centered on SiC devices as well as gate drivers that maximize performance to achieve greater miniaturization, higher output, and faster charging in battery-equipped applications.

We continue to develop products featuring industry-leading analog technologies.

Analog Solutions

ROHM contributes to the enhancement of systems by leveraging unmatched analog technologies made possible through our vertically integrated production system.
Sensor solutions for industrial equipment and IoT

IoT continues to expand into new areas to provide new services and functions, such as improving operations by visualizing and analyzing data collected during environmental and motion-related monitoring and providing early detection of abnormalities. ROHM supports the spread of IoT by providing stable sensing for industrial equipment, delivering high-accuracy amplification for sensors that detect conditions such as light, acceleration, and geomagnetic fields, and combining ultra-low-power power supply ICs, MCUs, and wireless communication devices.

Ultra-compact devices

ROHM supplies thin, ultra-compact components that support the continuing evolution of smartphones, wearable devices, and other increasingly multifunctional devices. We continue to pursue miniaturization technology that allows us to offer the smallest components in the world, from passives and discretes to ICs and modules, including the RASMID and PICOLED series, contributing to improved functionality and smaller form factors.

Mobile solutions

Contributing to greater miniaturization and improved functionality in mobile devices with the industry’s smallest components.

ROHM Group CSR and CSV Activities

The ROHM Group aims for sustainable growth of the Group and healthy development of society by conducting business activities with integrity in accordance with the goals and policies outlined in our Company Mission and Basic Management Policy. We are also contributing towards SDGs (Sustainable Development Goals) achievement, which are global goals adopted by the United Nations.

Framework for Promoting CSR/CSV

Within the ROHM Group, the CSR committee comprised of all directors and department heads with equivalent authority bears responsibility for CSR themes across the entire company, including the environment, society, and governance—with the president acting as chairman. Eight sub-committees further down in the organization identify issues after performing risk assessments in each field and obtain certification of the management system by forming sub-committees and task forces for implementing the PDCA cycle of CSR management (see table at right).

Eight sub-committees further down in the organization identify issues after performing risk assessments in each field and obtain certification of the management system by forming sub-committees and task forces for implementing the PDCA cycle of CSR management (see table at right).

The ROHM Group believes it is necessary to be proactive in solving social issues to ensure the sustainable growth of the company. Linking the SDGs established by the UN in 2015 to our business activities will help make CSV, which are the shared values of society and the company, a reality. To make CSV a reality and further advance the company and society, we set up opportunities for global dialogue with various stakeholders and defined six CSR Priority Issues for ROHM to tackle. Based on these priority issues, we will accelerate CSR and CSV initiatives and actively contribute to achieving a sustainable society through our business activities.

CSR and CSV Compromise the Core of Our Business Activities

The ROHM Group’s CSR Priority Issues

The ROHM Group’s Company Mission and Basic Management Policy

embody our firm desire to enrich society through our products and provide a basis for each employee to integrate into their own work. Based on these goals and policies, we will work to be a company that can meet the expectations of our stakeholders by further expanding CSV to solve social issues through CSR initiatives in line with social requirements and international norms.

Governance

Promoting CSR activities throughout the value chain

The ROHM Group has acquired management system certifications in a variety of fields, including quality, the environment, occupational health and safety, and information security. In addition, we implement the PDCA cycle of CSR management while undergoing internal and external audits. We also fulfill our responsibility to society throughout the value chain by requesting CSR self-assessments from our business partners and implementing CSR procurement audits.

Number of companies targeted for CSR self-assessment in 2017

1,390

(95% of targeted companies received an A or B evaluation)

BCM (Business Continuity Management) promotion

The ROHM Group develops countermeasures to minimize the risk of disruptions to our business activities and performance. Further, to minimize the impact on our customers and society as a whole, we are focused on BCM (training, strengthening our system, risk response) at each of our production sites.

Risk Management/BCM Organizational Diagram

Environment

Reducing CO₂ emissions

The ROHM Group promotes the visualization of equipment power usage and office energy consumption to reduce wasted energy while working to actively reduce CO₂ and PFC gas emissions that contribute to the greenhouse effect. Furthermore, we calculate the amount of CO₂ used throughout our entire value chain in an effort to reduce CO₂ emissions in all of our business activities.

2017 ROHM Group CO₂ reduction vs. BM*

273,000 tons

(approx. 31% reduction)

Energy conservation activities to reduce CO₂

At all our Shizuoka facility we are actively engaged in activities to protect the environment. In 2017, we installed a thermal recovery heat pump chiller and solar power generation system that reduced our CO₂ output by 6,003 tons vs the previous year. And we continue to work on energy conservation activities for the entire company, such as by retrofitting fluorescent lamps with LEDs.

Pursuing cyclical management

Within the flow of business activities ranging from material procurement to development, production, and sales, the ROHM Group works to reduce waste and recycle to eliminate wasted energy and limited resources. We also proactively carry out activities to solve environmental problems rooted in the local communities at each site.

A–

ROHM’s evaluation score

Recycling plastic bottle caps to help more people obtain polio vaccinations

Every year at our facility in Germany we recycle plastic bottle caps and donate them to a non-profit organization that helps people in Africa receive vaccinations against polio. Our contribution made it possible to provide vaccinations to around 50 people in Africa in 2017.

BCM (Business Continuity Management) promotion

The ROHM Group develops countermeasures to minimize the risk of disruptions to our business activities and performance. Further, to minimize the impact on our customers and society as a whole, we are focused on BCM (training, strengthening our system, risk response) at each of our production sites.

Voluntary RBA audits

Since 2013, the ROHM Group has voluntarily undergone audits through the RBA Validated Audit Process (VAP). Six of our overseas production plants have finished their audits as of 2017. Through these audits, we confirm that the entire ROHM Group is complying with the RBA code of conduct of CSR management and are working to strengthen management quality.

*BM (Benchmark): 2005 (The 19th Conference of the Parties of the United Nations Framework Convention on Climate Change)
Developing human resources through diversity

The ROHM Group states in its corporate objectives and policies that it will "research extensively for capable human resources and cultivate them as cornerstones for building long-term prosperity" and seeks to utilize and nurture diverse workforce without being bound by gender, nationality, religion, or other factors. We will actively promote diversity and develop our human resources in order to contribute to continued advancement and become a global leader.

Providing global support to engineers of the future

At the ROHM Group, we implement a variety of educational activities for local students in areas we do business in order to contribute to the development of the next generation of human resources possessing both a rich sense of humanity and intellect. We offer classes on manufacturing, sponsor robot contests, give seminars, and create educational programs for local students in areas we do business in order to contribute to the education of the next generation and provide opportunities for students to gain an understanding by seeing the facilities and listening to explanations on prevalent semiconductor industries in our daily lives and how they will continue to be important in the future.

Message from a student who participated in a company tour

The four-day trip is a fantastic experience for us to gain an understanding by seeing the facilities and listening to explanations on prevalent semiconductor industries in our daily lives and how they will continue to be important in the future.

- Nova Academy (Sweden)
- Jakob Elgen

Examples of policies introduced

- Transiting fixed-term employees into full-time employees
  - From April 2018, all interested candidates who have completed a five-year contract are converted to full-time employees.

- Internal system
  - Employees are given an interval of at least ten hours between the end of their shifts and the beginning of the next to guarantee sufficient rest.

- Flex-time system
  - Employees can adjust their working hours based on their work situation.

- Telecommuting program
  - Employees who find it difficult to get to work every day due to personal injury or the need to care for elderly family members are permitted to work from home.

- Expanded child rearing-related program
  - The amount of leave employees can take for child-rearing has been extended from one year to two years.

- Enhanced system for elderly nursing care
  - The length of time employees can take a leave of absence for elderly family members has been extended from one year to three years.

Work-Style Reforms in the ROHM Group (Achieving a flexible work life)

The ROHM Group believes that it is necessary to have an environment that allows us to achieve success using a wide range of human resources and a work style that leads to greater productivity as we continue to put our Company Mission into practice. We are also implementing work-style reforms at each of our companies that will enable both the company and employees to enjoy cyclical growth.

In this regard, ROHM has established a company-wide Work-Style Reform Committee, the members of which are selected from various departments and have different roles. They study and implement different policies based on feedback from the workplace centered on four themes: (1) organizational climate and awareness reforms, (2) program-based reforms, (3) operational process reforms, and (4) innovation-based reforms.

Number of students who attended a manufacturing class hosted by ROHM in 2017

We will actively promote diversity and develop our human resources in order to contribute to continued advancement and become a global leader.

Personal exchange program between mother and overseas plants
At our Malaysian production facility, we created a program that regularly sends employees to Japan to promote the exchange of employees with the mother plant in Okayama Prefecture. The goal is to give employees at all facilities a deeper understanding of their respective cultures, religions and philosophies, allowing the mother and overseas plants to carry out their duties as a unified team.

Examples of policies introduced

Transferring fixed-term employees into full-time employees
- From April 2015, all temporary candidates who have completed a five-year contract are converted to full-time employees.

Career track conversion program
- Depending on their career plan, employees can switch from general to career tracks.

Flex-time system
- Employees can adjust their working hours based on their work situation.

Internal system
- Employees are given an interval of at least ten hours between the end of their shifts and the beginning of the next to guarantee sufficient rest.

Telecommuting program
- Employees who find it difficult to get to work every day due to personal injury or the need to care for elderly family members, or are permitted to work from home.

Rahiring program
- Employees who need to leave the company for reasons beyond their control such as nursing care for elderly family members, a temporary in their spouse’s work schedule, or relocation opportunities to repatriate.

Expanded leave of absence program
- Employees who relocate with their spouses to a new location are granted a leave of absence for up to two years.
- Employees undergoing infertility treatment are allowed to take leave for up to two years.

Expanded child rearing-related program
- The amount of leave employees can take for child-rearing has been extended one year, from the day their child turns two years old to the day they turn three.
- The period of time that employees can work shorter hours has been extended from the time their child reaches second grade on the time they receive skill education.

Expanded system for elderly nursing care
- The length of time employees can request a leave of absence for care for elderly family members has been extended from one year to three years.

Cultural Support Activities
Implementing activities that contribute to the dissemination and development of music culture

ROHM Theatre Kyoto: A Cultural Institution

As an active supporter of the music arts for many years, ROHM acquired the naming rights of ROHM Theatre Kyoto, which reopened on January 15, 2016, for the next 50 years. The theatre is located in the heart of one of the city’s most prominent cultural areas, home to numerous historic shrines and art museums. We hope that this theatre will be cherished as an institution representing the cultural arts of Japan.

Rohm Music Foundation (a Public Interest Foundation)

The Rohm Music Foundation was established in 1991, with the goal of contributing to the popularization and development of music culture in Japan. As of 2018, the foundation has granted 494 scholarships and continues to host Scholarship Concerts performed by current scholars. The Foundation organizes the Kyoto International Music Students Festival to promote international exchange among young musicians and music seminars to foster professional musicians. The Foundation also offers financial support for music-related performances, research and more.

2,529
Includes 545 students from overseas
(as of June 2018)

ROHM Music Festival: A Music-Filled Event

Number of "Rohm Music Friends" - Musicians supported by ROHM and the Rohm Music Foundation

4,437
(as of June 2018)

The Kyoto International Music Students Festival, which has been held every year since 1993, invites students from leading music schools around the world as well as in Japan. This premier music festival promotes international exchange through music and provides a nurturing environment for young artists. Public performances are held over five days in a variety of genres using piano, stringed and wind instruments, vocals and orchestra. More than 2,000 visitors come each year to hear the lively performances of students that bring color to the start of the Kyoto summer season.

Since 2016, the ROHM Music Festival has been held at the entire ROHM Theatre Kyoto for two days per year. This festival features performances by the "Rohm Music Friends," a collective of musicians who have been supported by ROHM and the Rohm Music Foundation and are actively working as professional musicians, and by junior and senior high school students in the Kansai area. During this time the area comes alive with music, with good times enjoyed by all.

We continue to support the "Seiji Ozawa Music Academy," a development project for young musicians conducted by world-renowned conductor Seiji Ozawa. This is an unprecedented program in which young musicians in Asia are selected by audition to perform alongside top-class vocalists, led by professional musicians active on the global music scene as well as by Seiji Ozawa himself. This academy has hosted performances in ROHM Theatre Kyoto as the production base since it was opened in 2016. The academy has also hosted performances of "Opera for Children" since 2016, inviting elementary school children in Kyoto to enjoy this extravagant event.
